## EUROPEAN STUDENTS' ASSOCIATION FOR CULTURAL HERITAGE

*By young people, for young people*

### About us

We are a youth-led network of students and young professionals working within cultural heritage. We want to increase collaboration amongst young people through networking and peer-to-peer learning. Our team is composed of a coordination committee with more than 20 young volunteers spread in more than a dozen countries.

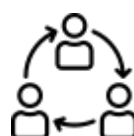

### Our Goal

To establish an interdisciplinary network of university students, from undergraduate to postgraduate levels, young researchers and early-career professionals working in cultural heritage within Europe. The development of this network will increase youth participation and knowledge exchange in heritage practice, contribute towards a more cohesive heritage practice in Europe and provide members with valuable inter-disciplinary knowledge which will prepare them for work in the challenging field of cultural heritage study, conservation and protection.

### Our Values

Civic engagement and participatory democracy

Collaboration and cooperation

Beyond geopolitical boundaries

Diversity of cultural expressions

Academic rigour
